**The Cátedra del Mar Centre for Innovation has opened:
true commitment to the environment**

A key project in the future of Marina Port Valencia. An initiative that underlines our commitment to sustainability, research and the protection of the marine environment, placing knowledge, innovation and respect for the sea at the core of the project.

A02 and A03: the new architecture that will define Marina Norte

We know that construction is a stage, but also a promise. The A02 and A03 buildings at Marina Norte will represent a turning point: modern spaces for offices, co-working and commercial units, designed in harmony with their surroundings.

Marina Sur is growing: new spaces, new services.

Water sports: work has begun on a new 5,000 m² space dedicated to sports and yachting.

Dry dock: almost 6,000 m² allocated to specialised facilities.

BUILDING THE FUTURE OF MARINA PORT VALENCIA

Marina Sur is evolving: new services, greater security

Shoreside services building: completion in December 2025. A brand new building with modern, climate-controlled changing rooms and bathrooms designed for the utmost comfort.

Security: new access controls in place from early in the year, plus 24/7 security service

Marina City: exclusive spaces under development

Captains' Club: construction now underway. More than 500 m² exclusively for our guests, with terrace and exceptional sea views.
